

## Anika Seth – Rockville, MD

Anika is a first-year at Yale University double-majoring in Biomedical Engineering and Women's, Gender, & Sexuality Studies, with a certificate in data science.

She participated in *FIRST* as a student for six years, competing in *FIRST* LEGO League, *FIRST* Tech Challenge, and *FIRST* Robotics Competition. Anika was also a member of *FIRST* Global Team USA in 2018, representing the country during the Olympics-style tournament in Mexico City. Her teams have received high-level awards, from Chairman's (FRC) at district qualifying tournaments to Inspire (FTC) at the 2018 World Championship.

Anika's favorite part of her *FIRST* experience has been starting and mentoring FLL Explore teams; in fact, she presented a conference titled "Building Communities for Early STEM Education" at the 2019 World Championship. Anika is so excited to continue working with *FIRST* Chesapeake this year as an alumni ambassador!
