

My name is Anthony Thompson, and I am a fourth year PhD student in Aerospace Engineering at the University of Maryland, College Park. I joined my first FRC team as a sophomore in high school in 2010 back when I lived in California. We were team 2073 Eagle Force. My first year on team 2073, we went to the world championship in St. Louis in 2011. I was on team 2073 for two years until I moved across town and started FRC team 4666 Robowolves. At the UC Davis Regional in 2013, our team won the FIRST Rookie All-Star Award and I returned to the world championship in St. Louis.
